DESCRIPTION

The design philosophy of G350: to create a bike that is both beautiful, convenient and comfortable, retaining the most of the great performance characteristics of Aostirmotor. The shock-absorbing front fork has a good shock absorption effect, reducing the bumpy feeling when riding on rough roads. Want a better-looking, more comfortable, lighter, and easier-to-handle city electric bike? Aostirmotor G350 is always your best choice!

Outstanding design:

The G350 is an elegant and versatile bike with a white outlooks, headlights, 20*2.1 narrow tires, front fork shocks, and a W5-LCD display. The Low step-through Frame design is friendly to the elderly and women, providing convenience and superior comfort. The sturdy aluminum rear rack is perfect for taking your adorable pet for a ride or taking your adorable kid to school.

Great performance:

Our light city electric bike G350 is equipped with 36V 10AH lithium battery and 350W motor power. It takes 4-6 hours to charge and can ride 25-35 kilometers. The Lightweight Aluminum Alloy Frame and puncture-resistant tires provide incredible stability. The responsive braking system with the front 180 and rear 160mm disc rotors provides sufficient stopping power even in the harshest conditions. The Shimano 7-speed shifter is designed for your riding experience, allowing you to change gears as needed to suit different terrains.
