Description

Aostirmotor 750W Electric Mountain Bike S07

Aostirmotor S07 is an e-bike designed for the love of mountains, its habitat and the sheer joy of riding uphill powered with pure electrical energy.

The S07 commute is a charming cycle with a front light to light up your path and a rear rack to carry your knick-knacks. Its ergonomic design with a stylish triangular frame is practical to mount and ride in comfort. The powerful 750W rear motor can ride 30 km with pure electric power. The 48V 13Ah battery takes up to 6 hours to charge fully and can help you reach speeds up to 27.9 mph.

The pedal, boost and power riding modes are perfect for a romantic cycling date or a frenzied race. Fitted with the Intelligent Controller, optimal utility features, durable battery, fenders to keep off water and 26"x4.0 fat tires for added grip on diverse terrains, you will no doubt be hailed as the conqueror of mountains.
