

ENGWE T14 350W MINI EBIKE

\$599

The T14 gives you the basics of an ebike and a little more. There's full front and rear suspension systems. There's a 350w motor when others have 250w, 48v when other would give you 36v. This foldable keeps things lean with an LED battery indicator. With a phone holder (not included), you've got a great GPS speedometer and sound system for this sweet little ride. At this price, you can afford to get enough for the whole family!
